

Please read all instructions carefully before assembly and use. Retain these instructions for future reference.

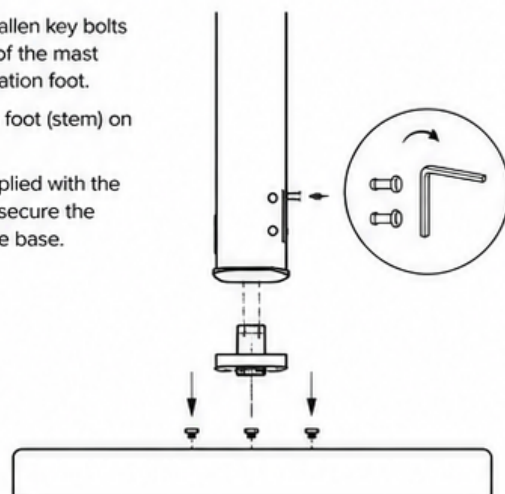

1 FIT THE WHEELS

- Lock the brake on each wheel.
- Insert each wheel into the base until it is fully seated.
- Release the brake.
- Repeat for all 4 wheels.

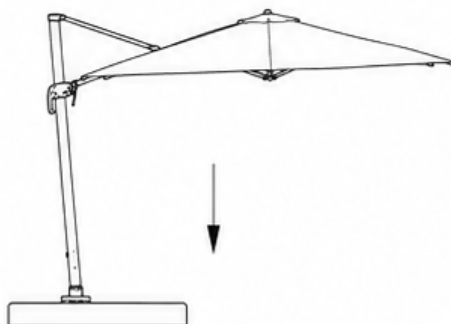

2 ATTACH THE ROTATION STEM

- Unscrew the two allen key bolts from the bottom of the mast to remove the rotation foot.
- Place the rotation foot (stem) on the base.
- Use the bolts supplied with the wheels carton to secure the rotation foot to the base.

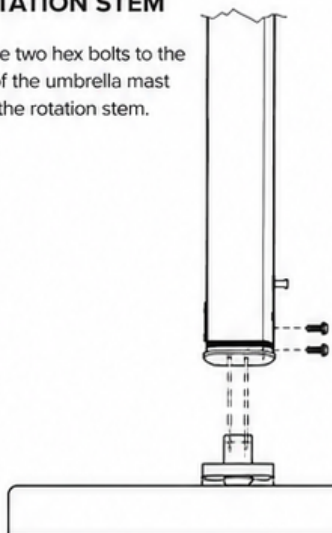

3 LOWER BASE AND PLACE UMBRELLA

- Gently lower the base down onto the wheels.
- Place the umbrella mast onto the rotation stem.

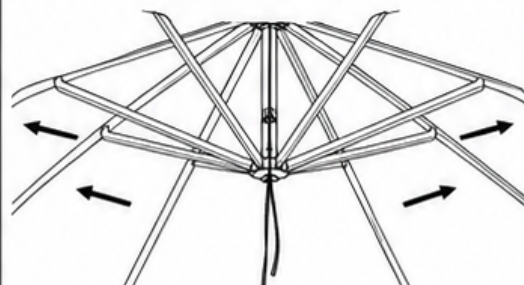

4 ATTACH MAST TO ROTATION STEM

- Attach the two hex bolts to the bottom of the umbrella mast and into the rotation stem.

5 REMOVE PACKAGING & CHECK STRUTS

- Reach up inside the umbrella and remove the packaging that protects the central struts.
- Make sure the longer umbrella struts are manually pushed away from the centre so they are not tight in against the central struts.

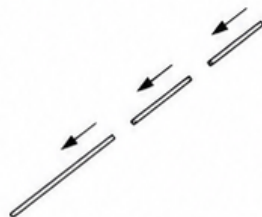

6 OPERATE & ADJUST

- Squeeze the handle and lift up so the umbrella is leaning forward.
- Attach the handle into position 1, and rotate until you can feel tension.
- The umbrella should open easily, but **DO NOT** over tighten.
- If it feels like there is excess tension, then reach in and double check the longer struts that the canopy is attached to, if free from the central struts.
- Keep opening until the rope in the centre is in the home position.
- Again, **DO NOT** over tighten.
- To adjust the angle of the umbrella Left or Right, simply remove the handle and place into position 2.
- Only one handle is supplied per umbrella.

PROTECTION COVER

- To assemble the protection cover, there are three fibreglass rods that are screwed together.
- Insert the assembled rod into the sleeve inside the cover near the zipper.

IMPORTANT

- In windy conditions, close and secure the umbrella.

- Do not leave the umbrella open in heavy rain.

- Remove snow and ice build-up.

- For best performance and longevity, use the protection cover when not in use.
